

Allied Health Professions (AHP) Preceptorship and Foundation Support Programme

The Programme's aim is for AHPs to have inclusive access to tailored support and development opportunities across a range of transitions

The programme aims to support over three phases of Pre-preceptorship, Preceptorship and Foundation support.

These phases are described as:

Pre-Preceptorship: A period of preparation for AHP's to support their transition towards employment.

Preceptorship: A period of structured support and development during periods of transition, during which the AHP will be supported to help them grow in confidence as an autonomous and accountable practitioner.

Foundation Support: A matrix of opportunities for professional and personal development for AHPs, that supports upskilling across the 4 pillars of practice, while simultaneously supporting developing a diverse workforce fit for the future.

Resources

Step to Work - an online programme to provide an additional layer of support to ease the transition into employment for AHPs (pre-preceptorship).

Multiprofessional Preceptor e-Compendium – 5 units to recognise the needs of preceptors, and provides them with the guidance, support and practical tools needed to carry out their vital role.

Growing your AHP Career – resources to support an alternative narrative for career conversations focusing on growth.

Pre-Preceptorship Best Practice Guidance – resources for education and placement provider settings to aid transition into employment.

The Health and Care Professions Council Principles for Preceptorship & NHS England AHP Preceptorship Standards and Framework - information and advice for organisations and systems that are working to ensure their AHPs have access to high-quality preceptorship.
